

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

Valvoline Calibration Fluid

Description

Valvoline Calibration Fluid is a product used for the calibrating and flushing of diesel fuel injection equipment. The viscosity and density are strictly controlled to ensure accurate calibration of injection pumps.

Approvals/Performance Levels

Valvoline Calibration Fluid complies with the following specifications: SAE J 967, ISO 411.3

Properties

Test

Density @ 20°C
Viscosity @ 40°C
Flash Point °C

Typical Property

0.8020
2.5 cSt
77

This information only applies to products manufactured in the following location(s): South Africa
